

## SUMMARY

Data Analyst with 9+ years of experience driving measurable results through team leadership, process improvement, and data-driven decision-making. Skilled in Python, SQL, and data visualization to analyze complex systems and automate reporting.

## TECHNICAL SKILLS

**Data Analysis & Visualization:** Advanced Excel (PivotTables, Macros), Power BI, Tableau, Matplotlib

**Programming & Analytics:** Python (Pandas, NumPy, scikit-learn), SQL, Java

**Databases & Tools:** SQL Server, PostgreSQL, Snowflake, BigQuery, Git, GitHub, Jupyter Notebooks

**Additional:** Data Cleaning, Automation, Dashboarding, Fluent in Spanish

**Certification:** AWS Cloud Practitioner (In Progress)

## PROFESSIONAL EXPERIENCE

**The LEAGUE of Amazing Programmers, San Diego, CA: Program Manager** September 2021-Present

- Led operations for a technical school, overseeing 7 staff and 20+ volunteers; hired, onboarded, and trained new instructors to deliver engaging lectures, increasing student retention by 18%.
- Designed advanced Excel reports to track onboarding and training metrics, improving staff retention by 25% and saving the organization \$12,350 by recruiting and coordinating volunteers to lead and support coding classes.
- Replaced the program's manual monthly student-reporting process with an internal platform I built and deployed, giving every instructor a structured review workflow and administrators live visibility into review completion and guardian feedback across all classes.
- Built and maintained Java and Python curriculum, expanding program reach to 1,000+ students across San Diego.

**Border Angels, San Diego, CA: Programs Coordinator** December 2015 - Present

- Developed automated Excel reporting and implemented volunteer management software, saving \$12,000+ annually.
- Built Python-based ETL pipeline to consolidate cross-departmental program data into automated Google Sheets dashboard, enabling organization-wide KPI tracking across \$84K+ in expenditures and 1,362+ people served.
- Delivered data-driven presentations on program performance to 600+ participants, strengthening organizational credibility and increasing monetary donations by 30%.

**Starbucks, San Diego, CA: Store Manager** November 2013 - March 2021

- Analyzed business reports to make business decisions; utilizing P&L, daily and weekly reporting to direct a team of 30+ employees in a high-volume \$2.5M annual revenue location, increasing profit by 14%.
- Hired, onboarded and trained employees to improve customer satisfaction rating by 230%; using weekly reports to drive employee performance adjustments that improved the customer experience and boosted satisfaction metrics.
- Recognized as Starbucks Manager of the Quarter (FY20/Q1), San Diego Barista Champion (2017), and Coffee Master.

## RELEVANT PROJECTS

**IBM HR Attrition Analysis Dashboard, Individual Project** February 2026

- Developed an interactive HR analytics dashboard in Tableau analyzing attrition patterns across 1,470 employees, identifying that overtime workers leave at 3x the rate of non-overtime employees
- Built calculated fields and filters to segment attrition by department, tenure, salary band, and satisfaction level.
- Discovered actionable insights including 40% attrition among Sales Representatives and 35% turnover in first-year employees, informing workforce planning recommendations

**LEAGUE Student Progress Report Platform, Work Project** February 2026 - June 2026

- Architected and deployed a full-stack web application (React + TypeScript, Express, SQLite/Drizzle ORM) that automates monthly student progress reporting across instructors and students, with Docker Swarm production deployment.
- Integrated Pike13 CRM and GitHub APIs to aggregate student attendance and coding activity data; built an admin analytics dashboard tracking review compliance rates, guardian feedback scores, average ratings, and submission trends by month.
- Engineered AI-powered review generation using the Claude API (Anthropic) that synthesizes attendance records and GitHub commit history into personalized progress narratives; automated Slack compliance reports and email delivery to guardians.

**Google Analytics E-Commerce Dashboard, Individual Project** January 2026

- Engineered BigQuery SQL views with UNNEST operations and aggregation functions to analyze 903,653 e-commerce sessions, creating an interactive dashboard with 4 pivot tables and 5 slicers for multi-dimensional filtering across channels, devices, and geography.
- Built Google Sheets Connected Sheets integration with dynamic visualizations tracking \$1.54M revenue, enabling self-service analytics for stakeholders.
- Identified mobile optimization opportunity: desktop users generate 95.6% of revenue despite mobile representing 23% of traffic, with referral channel driving 42% of total revenue (\$651K).

## EDUCATION

**B.S. Information Technology, Concentration on Information Systems** December 2024

Arizona State University - Ira A. Fulton Schools of Engineering, Tempe, AZ

- Dean's List, Fall 2023
